---

## Skills

I am very skilled in computer technology, and I enjoy spending time working with computers. I also am good at video editing and some smaller physical projects.

---

## Experience

### Team 2137 / Team Member

August 2019 - PRESENT

I have been a part of my high school's robotics team since I started at the high school. I am part of the "Marketing and Media" subgroup on our team, where we do a lot of digital and physical designs that our team uses for recruiting and at our competitions, while also taking on larger public-facing projects, like the team website and writing press releases.

### CyberPatriot / Team Member

October 2018 - PRESENT

I have been a part of my school's CyberPatriot team since before I started high school. CyberPatriot is a cybersecurity program run by the Air Force which allows students to compete in a set of challenges towards securing simulated computer systems and networks. Our team also had a YouTube channel which I ran that gave other teams the opportunity to learn how to improve their competitions and skills.

### YouTube Editor

November 2019 - January 2021

I was a video editor for two small YouTube gaming channels. I also helped their creators set up and manage their channels during their channels' uptime. I edited roughly a video per week for each channel, taking live streams or long recording sessions that were typically 2-3 hours long and turning them into shorter, 10-20 minute videos for YouTube. Both creators have hidden their channels from the public after losing interest in doing YouTube, which is why I ended editing videos.

---

## Education

### Oxford High School

August 2019 - PRESENT

I am currently in my junior year at Oxford High School, expecting to graduate in 2023

---

## Certifications

I have 8 certifications in different topics. These certifications include:
